Situation:

A strong upper level storm system brought showers and thunderstorms from west to east across most of the State. Heavy rainfall, flash flooding, river flooding and damaging winds were the main threats associated with this front. Please stay tuned to your local National Weather Service for the latest information.

North Louisiana:

No hazardous weather is expected this afternoon and tonight. Scattered showers and thunderstorms can be expected Wednesday night in advance of a cold front moving across the area. Hail and strong gusty winds will be possible in the stronger storms.
