Situation: A strong upper level storm system brought showers and thunderstorms from west to east across most of the State. Heavy rainfall, flash flooding, river flooding and damaging winds were the main threats associated with this front. Please stay tuned to your local National Weather Service for the latest information.

North Louisiana: There is an enhanced risk of severe thunderstorms today, as thunderstorms increase in coverage later today. Although a strong or severe thunderstorm was possible this morning, the threat will increase this afternoon and evening and potentially continue into the overnight hours. Primary threats will be large hail and damaging winds with isolated tornadoes.
