GOHSEP DAILY OPERATIONAL REPORT 19 September 2011

1. TROPICAL WEATHER UPDATE: As of 1300 hours 19 September 2011, the NWS/NHC is reporting on the tropical feature listed below. This system will not pose a threat to Louisiana.

An area of low pressure located about 1450 miles east of the Windward Islands has not become any better organized although environmental conditions still appear favorable for the development of a tropical depression during the next couple of days. This system has a high chance, about 60 percent, of becoming a tropical cyclone during the next 48 hours as it begins to move westward at about 5-10 mph.
