GOHSEP DAILY OPERATIONAL REPORT 20 September 2011

1. TROPICAL WEATHER UPDATE:

As of 1300 hours 20 September 2011, the NWS/NHC is reporting on the tropical feature listed below. This system will not pose a threat to Louisiana.

A large low pressure system is located about 1500 miles east of the Windward Islands and continues to show signs of organization. Environmental conditions are expected to remain conducive for a Tropical Depression to form later today or on Wednesday. This system has a high chance, about 70 percent, of becoming a tropical cyclone during the next 48 hours as it begins to move westward at about 5-10 mph.

Tropical wave is analyzed from 10N18N along 17W moving west at 10-15 mph.
