As of 1300 hours 27 September 2011, the NWS/NHC is reporting on the tropical features listed below. These systems will not pose a threat to Louisiana.

Tropical Storm Philippe is centered at 15.8N 35.3W or 650 miles west of the Cape Verde Islands moving west at 5 mph. Maximum sustained wind speed is 45 mph with higher gusts.

The remnants of Ophelia are located a short distance east-northeast of the northern Leeward Islands. This disturbance is producing a large area of showers and thunderstorms, and upper-level winds appear somewhat conducive for additional redevelopment as the low moves slowly west-northwestward to northwestward during the next day or two. This system has a high chance, about 90 percent of regenerating into a tropical cyclone during the next 48 hours. Locally heavy rains are possible over portions of the northern Leeward Islands through Wednesday.

Tropical wave is analyzed from 3N22N along 10N21W moving west at 10 mph.
