GOHSEP DAILY OPERATIONAL REPORT
21 October 2011

As of: 1030 Hours

STATE EOC ACTIVATION LEVEL: Level 4 (Normal operations)

1. TROPICAL WEATHER UPDATE:

As of 0800 hours 21 October 2011, the NWS/NHC is reporting on the tropical features listed below. None of these systems pose a threat to Louisiana.

A nearly stationary area of low pressure located over the western Caribbean Sea between Nicaragua and Jamaica is producing a large area of cloudiness and thunderstorms. Surface pressures are falling and upper-level winds are expected to become more favorable for development. This system has a medium chance about 30 percent, of becoming a tropical cyclone during the next 48 hours.

A large area of disturbed weather is located a couple hundred miles southeast of the Windward Islands remains disorganized. Although surface pressures are falling, development, if any, will be slow to occur. This system has a low chance, about 10 percent of becoming a tropical cyclone during the next 48 hours.
