As of 1600 hours 23 August 2012, NWS/NHC is monitoring three tropical systems in the Atlantic-Caribbean-Gulf of Mexico basin. These systems are:

- Tropical Storm ISAAC
- Tropical Storm JOYCE
- Invest 96

The link below shows the current location of these three systems:

http://www.nhc.noaa.gov/gtwo_atl.shtml

It is too early to project what will happen with Invest 96 and Tropical Storm Joyce is projected to remain out in the Atlantic. The one of most concern for Louisiana at this time is Isaac.
