As of 1830 hours 5 June 2013
ACTIVATION LEVEL: CRISIS ACTION
TEAM (CAT) as of 0730 hours 5 June 2013

As of 1830 hours 5 June 2013, the NWS/NHC continues to track TROPICAL STORM ANDREA, the first named system of the 2013 Atlantic-Caribbean-Gulf of Mexico hurricane season. The graphics provide with this report shows the latest location of ANDREA and its projected path. At this time, ANDREA is not projected to have any major impact on Louisiana. Actual impact for Louisiana is addressed below. While heavy rains and gusty winds are projected for Florida and the eastern coastline through the weekend, this system will have only minimal impact on Louisiana mainly in the coastal regions. The GOHSEP Crisis Action Team was activated at 0730 hours 5 June 2013 and will remain activated until further notice.
