Proclamation NO. 28 BJ 2015 State of Emergency – Transportation and Delivery of Propane and Heating Fuels

<br />

SITUATION: Lingering showers and below average temperatures will remain throughout the day and continue into Thursday. Considering the temperature trends and precipitation coverage, residents are urged to continue monitoring the latest statements and forecasts for additional information on this hazardous winter weather event.

FORECAST for LOUISIANA

Southeast Louisiana: Widespread rain is developing across the region today, however no freezing precipitation is expected. A large arctic mass will be moving into the area this evening bringing dry air and below normal temperatures through Friday.

Southwest / Central Louisiana: Areas of light rain and drizzle continue to fall across the area moving rapidly off to the northeast keeping temperatures a bit cooler than normal. The next front is expected through late on Thursday. This latest front is not expected to bring any rains.
